

Complements

Universal Favourite
universalfavourite.com.au

Complements is a modular system of chocolates that conducts experiments with colours and patterns. It combines 3D printing, design and the amazing chops of the well-known chocolatier Bakedown Cakery. Wanting to create something outside the box that could be paired in endless combinations, the designers at Universal Favourite created an original modular shape that was 3D printed into positives and then turned into chocolate moulds.

DEGRÉ

Tim Defleur and Benjamin Helle | Accent
timdefleur.com | benjaminhelle.com

Degré is an auxiliary heater and/or air-conditioner that creates a bubble of heat or coolness around its user almost instantly. With its playful shape and warm materials, it invites users to get closer to it – sit on it, sit astride or back against. It is the modern-day, space-conservative equivalent of a rest next to the fireplace; it is the cat purring by your feet at the end of the bed; it is the coffee break in a snowy morning.

Daydream

Joynout
Joynout.com

Tel Aviv-based design studio Joynout launched *Daydream*, a minimalistic, multi-functional seat at this year's Salone del Mobile. The sculpture-like seat, inspired by the symbol for infinity, offers users new and unexpected ways of sitting, lounging and interacting. Designed by Assaf Israel as a continuation of the D&A seating system, the seat enables the user to lounge in an inclined position, promoting a relaxed and meditative state.

Catissa Geobed

Ishat Garipov
catissa.com

Catissa Geobed is a stylish space specifically designed with cats in mind. The Geobed is an icosahedral kitty temple. Made out of triangular wooden pieces and fixtures, this easy-to-assemble cat-bed is the perfect space for your feline! It is cosy and covered; besides being really easy to put together. If you're creative enough, you can even make your own modular monument for your furry friend.

Luciano

Paolo Cappello | Newblack
paolocappello.com | newblack.it

Industrial designer Paolo Cappello has developed *Luciano* – a Bluetooth speaker that offers a simple and immediate listening experience. Designed for Italian brand Newblack, Luciano is entirely manufactured with ceramic material found in Nove – an emblem of distinct Italian craftsmanship. The audio system is also handmade and the best components used in the Hi-Fi industry are applied into it. Luciano is offered in six choices of colours, glossy or matte, and even in a model made of pure 24k gold.

STORY

Simon Morris | Flyte
flyte.se

STORY was conceived from a fascination and passion on how we all perceive time, which can be quite different from one person to the other, and also the designer's love for levitating objects. It seeks to ground the idea of time back to its physical routes, marking the passage of hours with a levitating silver sphere that glides around a reassuring wooden base. It is the first levitating timepiece that travels through the air allowing you to personalise your own time.

Mountain Buggy Unirider

Mountain Buggy
mountainbuggy.com

The *Mountain Buggy Unirider* is a patented design innovation with a unique riding experience that develops a child's balance and confidence, and allows for valuable family-time bonding. It is simple, fun and easy to use for a child from around two years and up and provides a perfect solution for both parent and child, whether going for a walk or jog. It is lightweight, yet durable and can be pushed effortlessly with one hand.

Viride

Goula / Figuera Studios
goulafiguera.com

Viride is a collection of experimental luminaries that brings together two elements which are almost always present in a domestic landscape: artificial lighting and vegetation. Creating a new typology of objects, the collection is composed of three different models, each one specially designed for a specific plant's morphology. All of them have one or more carefully programmed LED panels with a colour scheme suitable for interiors and at the same time convenient for the growth of the plants.
